PROFILE

Mobile developer in Germany, looking for a new position and a new way to contribute. I ship Flutter applications for iOS and Android, from the first feature through release, and I also work with Java and system design. At EdTrust I led EdTeacher, EdManager, EdStudent, and EdParent.

WORK EXPERIENCE

Flutter Lead (Full-time) July 2024 – Present
EdTrust, Tunis
Full-time Flutter lead, working hybrid. Led development and deployment of EdTeacher, EdManager, EdStudent, and EdParent. These apps are used by thousands of teachers, students, administrators, and parents for school communication and monitoring. The work covers system design, a scalable architecture, Flutter, GetX, Firebase, CI/CD, and API integrations, through release on iOS and Android.

Flutter Developer (Part-time) September 2022 – July 2024
EdTrust, Tunis
Part-time Flutter developer, working remotely, on the EdTrust applications. Built features, connected APIs, and supported releases on iOS and Android.

Flutter Intern June 2022 – August 2022
EdTrust, Tunis
Flutter developer intern on the mobile team. Contributed to Flutter applications for teachers, students, parents, and school administrators.

Mobile Developer (Contract) September 2024 – July 2026
Invertech
Built an inventory application that keeps working online and offline. It scans barcodes, tracks missions in real time, and stays in sync through REST APIs, local storage, and live communication.

Mobile Developer (Contract) January 2024 – June 2024
Azombwe
Developed an education app of interactive quizzes on African culture, together with the British Council. Designed the interface and connected it to Firebase and REST APIs.

Mobile Developer Intern February 2023 – August 2023
Rooly
Worked on a roadside-assistance application that connects drivers with nearby service providers. Added geolocation, maps, authentication, and the API integration that supports those interactions in real time.

EDUCATION AND TRAINING

Engineer's degree, Computer Software Engineering 2023 – 2026
TEK-UP University of Digital Sciences, Ariana, Tunisia

PROJECTS

Sip & Sync POS — Flutter, Dart, and Serverpod. Café system for several locations, with real-time orders and inventory. Built for the Serverpod Flutter Hackathon (Devpost).

E-commerce application — Flutter, GetX, Firebase, and MVC, covering storefront flows on mobile and web.

Movies applications — One client in Ionic and TypeScript, and a native SwiftUI client.

DIGITAL SKILLS

Mobile: Flutter, Dart, GetX, BLoC, SwiftUI, iOS, Android

Data and APIs: Firebase, REST APIs, Serverpod, Shelf, Frog, offline synchronization, local storage

Product features: Barcode scanning, geolocation, maps, authentication, real-time updates

Engineering: CI/CD, Git, GitHub, scalable app architecture

Also used: Java, system design, software architecture, TypeScript, NestJS, Express, Angular, Ionic, PostgreSQL, MongoDB
