PROFILE

Software engineer in Germany, looking for a new position and a new way to contribute on a product team. I design mobile products and the services behind them, with Java, system design, Flutter, and REST. At EdTrust I led EdTeacher, EdManager, EdStudent, and EdParent.

WORK EXPERIENCE

Flutter Lead (Full-time) July 2024 – Present
EdTrust, Tunis
Full-time Flutter lead, working hybrid, for EdTeacher, EdManager, EdStudent, and EdParent. These applications are used by thousands of teachers, students, administrators, and parents. Owns system design and the application architecture, connects Firebase and external APIs, and runs CI/CD so features ship on iOS and Android.

Flutter Developer (Part-time) September 2022 – July 2024
EdTrust, Tunis
Part-time Flutter developer, working remotely, on the same applications. Shipped features against REST and Firebase and supported the architecture used for iOS and Android releases.

Flutter Intern June 2022 – August 2022
EdTrust, Tunis
Flutter developer intern. Contributed to production applications for teachers, students, parents, and school administrators.

Mobile Developer (Contract) September 2024 – July 2026
Invertech
Delivered an inventory product with offline synchronization, barcode scanning, and live mission tracking. The client talks to REST APIs, keeps data locally, and updates through real-time communication.

Mobile Developer (Contract) January 2024 – June 2024
Azombwe
Built an education product of interactive quizzes on African culture, with the British Council. Implemented the interface and connected the client to Firebase and REST APIs.

Mobile Developer Intern February 2023 – August 2023
Rooly
Implemented features for a roadside-assistance service that matches drivers with nearby providers. The work added authentication, geolocation, maps, and the API layer behind them.

EDUCATION AND TRAINING

Engineer's degree, Computer Software Engineering 2023 – 2026
TEK-UP University of Digital Sciences, Ariana, Tunisia

PROJECTS

Sip & Sync POS — Flutter client with a Serverpod backend. Multi-location café operations, real-time orders, and inventory. Serverpod Flutter Hackathon (Devpost).

GraphQL API — TypeScript service with NestJS and GraphQL.

E-commerce application — Flutter, GetX, Firebase, and MVC for mobile and web.

Movies applications — Ionic/TypeScript client and a native SwiftUI client, against the same product idea.

DIGITAL SKILLS

Languages: Java, Dart, TypeScript, JavaScript
Architecture: System design, software architecture, API design
Mobile: Flutter, GetX, BLoC, SwiftUI, Ionic, iOS, Android
Backend: NestJS, Express, Serverpod, Shelf, Frog, REST APIs, GraphQL
Data: PostgreSQL, MongoDB, Firebase, local storage, offline synchronization
Engineering: CI/CD, Git, GitHub, authentication, real-time communication

LANGUAGES

Arabic — Native · French — Second language · English — Full professional proficiency · German — A2 — currently learning
