PROFILE

Software engineer in Kirchhain, Germany, with a mobile core and hands-on backend work. Since June 2022, led four production applications for teachers, students, parents, and school administrators. Ships features against REST and Firebase, including offline sync, real-time updates, authentication, and CI/CD. Also works in TypeScript (NestJS, Express, Angular, Ionic), PostgreSQL, MongoDB, and Serverpod.

WORK EXPERIENCE

Mobile Team Lead June 2022 – Present
EdTrust, Tunis
Leads delivery of four production applications used by teachers, students, parents, and school administrators. Defined the architecture, connected Firebase and external APIs, and set up CI/CD so client features ship reliably against the backend services.

Mobile Developer (Contract) September 2024 – July 2026
Invertech
Delivered an inventory product with offline synchronization, barcode scanning, and live mission tracking. The client talks to REST APIs, keeps data locally, and updates through real-time communication.

Mobile Developer (Contract) January 2024 – June 2024
Azombwe
Built an education product of interactive quizzes on African culture, with the British Council. Implemented the interface and connected the client to Firebase and REST APIs.

Mobile Developer Intern February 2023 – August 2023
Rooly
Implemented features for a roadside-assistance service that matches drivers with nearby providers. The work added authentication, geolocation, maps, and the API layer behind them.

EDUCATION AND TRAINING

Engineer's degree, Computer Software Engineering 2023 – 2026
TEK-UP University of Digital Sciences, Ariana, Tunisia

PROJECTS

Sip & Sync POS — Flutter client with a Serverpod backend. Multi-location café operations, real-time orders, and inventory. Serverpod Flutter Hackathon (Devpost).
github.com/ihebmeftah/sip_sync

GraphQL API — TypeScript service with NestJS and GraphQL.
github.com/ihebmeftah/nest_graphql

E-commerce application — Flutter, GetX, Firebase, and MVC for mobile and web.
github.com/ihebmeftah/E-commerce-Full-App-Web-Getx---Firebase-Mvc

Movies applications — Ionic/TypeScript client and a native SwiftUI client, against the same product idea.
github.com/ihebmeftah/movieapp_ios_swiftui

DIGITAL SKILLS

Languages: Dart, TypeScript, JavaScript
Mobile: Flutter, GetX, BLoC, SwiftUI, Ionic, iOS, Android
Backend: NestJS, Express, Serverpod, Shelf, Frog, REST APIs, GraphQL
Data: PostgreSQL, MongoDB, Firebase, local storage, offline synchronization
Engineering: CI/CD, Git, GitHub, authentication, real-time communication
